

## Extending Workflow Efficiencies to Beyond the Printed Output.

PlanetPress Image, PlanetPress Fax and PlanetPress Search<sup>1</sup> have been bundled as a companion product to PlanetPress Watch and PlanetPress Server, now available as PlanetPress Imaging<sup>2</sup>.

PlanetPress Imaging enables PDF, TIFF and JPG image generation to automatically archive, email and/or fax your variable data documents. An index file is also generated for location and retrieval of specific pages of the print run with PlanetPress Search or by a third party electronic document management (EDM) system.

### Simultaneously and seamlessly archive documents created with PlanetPress Design.

Reduce the storage cost and hassle of keeping and misplacing hard copies. Archive the digital images on your server or into your third party document management system. The small file format and highly searchable indexed files streamline the location and retrieval process.

### Distribute your documents by email, with no human intervention.

For those customers who prefer communications, such as invoices or statements, via email, set up automated output processes to automatically distribute documents.

### Automatically send documents by fax.

PlanetPress Fax, enables output to a fax modem or to a fax server from a host computer, with no human intervention. No need to print first, then manually send the faxes. Streamline your workflow and achieve greater efficiency!

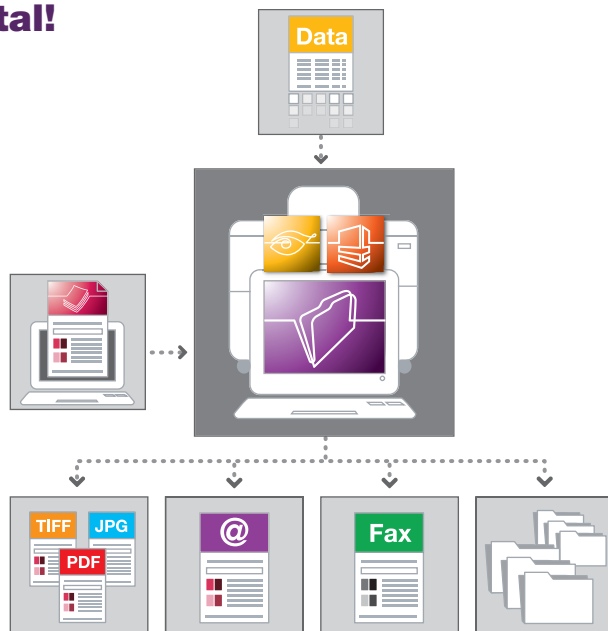

<sup>1</sup> A single licence can be registered and used on all your workstations.

<sup>2</sup> Requires separate installation and activation of PlanetPress Image, PlanetPress Fax and PlanetPress Search.

## > Benefits

- Integrates with most EDM systems
- Up to the minute results
- Full control over PDF creation and security settings
- Frees up floor space from file cabinets for better business use
- No more misplaced or lost documents
